## CATALOGUE OF STANDARD ORDNANCE ITEMS: VOLUME 3 4: SMALL ARMS, MISCELLANEOUS EQUIPMENT AND AMMUNITION

Periscope Film LLC. Paperback. Book Condition: New. Paperback. 214 pages. Dimensions: 10.0in. x 8.0in. x 0.5in. During WWII, the U. S. Armys ranks of men and its arsenal of equipment grew mightily. From a mere 190,000 soldiers in 1939, the Army would reach 8.4 million in 1945. That was a staggering achievement, and what is even more impressive is to consider how few guns, tanks, artillery and other essentials the military possessed prior to Pearl Harbor. Outfitting Americas war machine, and assessing its needs and delivering the goods, was one of the War Departments most challenging tasks. To make it work, some weapons would be pressed into production even though they were obsolete, while others would be adopted as expedients in hopes that better replacements would soon be delivered. The full scope of what was produced in the handful of years between the military build-up that preceded December 7th and V-J Day is hard to comprehend. Fortunately, the War Department left behind this four volume Catalogue of Standard Ordnance Items. A master catalogue that was once classified Confidential, it neatly lists most if not all of the vehicles, weapons, ammunition, and combat equipment that fought historys greatest war, its an astonishing compendium. This book contains both Volume 3 and Volume 4 of the Catalogue. Volume 3 details small arms including machine guns, submachine guns, rifles, shotguns, grenade and rocket launchers, helmets, body armor, bayonets and knives, and other equipment. Volume 4 details all types of ammunition from 20mm to 16 inch, hand and rifle grenades, mines, subcaliber and practice ammunition, artillery and bomb fuzes, rockets and rocket launches. Companion books include Volume 1 which focuses on tanks, armored cars and vehicles, and Volume 2 which focuses on artillery. This publication represents the first time in seventy years that Volume...
