Ever since the publication of the first edition it has been considered the standard authority on sheet metal pattern cutting, and many affectionately term it *The Bible of the Trade*. No better textbook for home study is available, and, even though the student does not know a thing about arithmetic or drawing, he may soon master both linear and geometrical drawing if he will diligently study the chapters on these subjects. The Secret of Success in sheet metal pattern drafting is in knowing how to apply the principles of geometry to your problem. If you will drill yourself carefully in both linear and geometrical drawing, you will never be stuck, no matter how difficult a job you may get. The facts given in these two chapters of the book may help you to make good. Therefore, study them now and keep at it until you know them as you do your tools. The pattern problems are arranged so as to take the student from the most elementary work, by easy stages, through every branch of sheet metal work to the development of the most difficult problems by the modern system of Triangulation. This is the only book...
